

Samsung SGH-T639 Water Damage Indicator

This guide will give instructions for identifying water damage to the Samsung SGH-T639.

Written By: Yi Ren

INTRODUCTION

This guide contains photos that do not include pictures of the back cover or battery. However, the instructions have been adjusted to reflect this lack of visual aid.

Step 1 — Battery

- Flip the phone over and take off the back cover

i Note: These images do not contain the back cover or battery of the phone.

Step 2

- Use button to remove battery from the phone.

i Note: These images do not contain the back cover or battery of the phone.

Step 3 — Samsung SGH-T639 Water Damage Indicator

- Locate the white square on the back of the phone.
- If the square is solid white, the phone has not received any water damage.

Step 4

- Locate the white square on the back of the phone.
- If the square is red at all, the phone has been exposed to water damage.

To reassemble your device, follow these instructions in reverse order.
